

API's Pipeline Safety Management System (SMS) Assessment Program

PRICING

PRICING STRUCTURE

API's Pipeline SMS Assessment Program advances a culture of safety and identifies opportunities for step changes in pipeline safety performance throughout the industry. The program offers feedback and benchmarking on industry performance to identify trends and encourage pipeline safety collaboration. Each assessment is flexible and scalable based on the size of the operator and scope of operations to provide a more effective evaluation tool across the pipeline industry.

OPERATOR SIZE	API MEMBER	NON-API MEMBER	INTERNATIONAL
Small Operator: < 1.5 million work-hours	\$55,000	\$65,000	+ \$10,000
Medium Operator: > 1.5 million < 5 million work-hours	\$75,000	\$90,000	+ \$15,000
Large Operator: > 5 million work-hours	\$95,000	\$110,000	+ \$20,000

Pricing Per Element

API offers assessments on a per-element basis to help operators assess a certain focus area and assess certain elements of their Pipeline SMS due to business focus or internal assessment requirements. While completing a full assessment is always recommended to best understand how their SMS is working together to be effective, evaluating an individual element can drive improvements in a specific area.

PSMS PER ELEMENT PRICING	DOMESTIC	INTERNATIONAL
Small Operator: < 1.5 million work-hours	\$13,000	\$18,000
Medium Operator: > 1.5 million < 5 million work-hours	\$18,000	\$23,000
Large Operator: > 5 million work-hours	\$23,000	\$28,000
