

API Price Increase

This is API’s first price increase in 5 years to accommodate annual rising costs. As is standard with most industries and sectors, the cost to create, maintain and administer programs have annual accruals. To accommodate this, an approximate 4% price increase will be applied for the majority of programs. API has incorporated the minimum increase possible to uphold a fair overall cost for candidates.

API 1169 has a higher increase since it was undervalued at its initial launch. The API 1169 certification has added substantial benefit to the pipeline industry. Subsequently, the weight of the certification and its career advancement opportunities for certificate holders has boosted its significance for companies, inspectors and contractors alike.

Note: For 510/570/653 members, a \$30 increase translates into a \$6 per year, or a \$0.50 per month increase.
