RE: API Standard 608, 6<sup>th</sup> Edition

Please be advised that the **6<sup>th</sup> Edition of API Standard 608, Metal Ball Valves-Flanged, Threaded, and Welding Ends**, has been published.

- The date of issue of this Edition is January 2020
- The Monogram Program Effective Date of this Edition is July 1, 2020

Your facility should ensure that revisions to the Standard are incorporated into your quality management system and that affected personnel are trained on any new requirements and are competent to perform the required activities. This should be completed prior to the Standard's effective date and subsequent audit.

The licensed or applicant organization is required to maintain at least one copy of the most current edition of the English language version of the API Product Standard(s) under which it is licensed or seeking licensure. Current API publications may be purchased in the [API Monogram Web Store](#).

If additional information or clarification is required, please contact us at [certification@api.org](mailto:certification@api.org).

Thank you for your continued dedication and support in maintaining the highest quality and product standards throughout the oil and gas industry.

Sincerely,

Sharon Bowie  
Manager, Monogram/APIQR
