RE: API Specification 2MT2 – Rolled Shapes with Improved Notch Toughness

Please be advised that effective November 15, 2017, API will withdraw API Specification 2MT2 – *Rolled Shapes with Improved Notch Toughness* from the Monogram Program. At that time, online applications for a 2MT2 Monogram license will be disabled, and any current applicants will be withdrawn. Please note that API has not issued any 2MT2 Monogram Certificates; therefore, no manufacturers will be affected by this action. Organizations may continue to manufacture products to the requirements of API Spec 2MT2; however, those products are not eligible for monogramming.

Current API Specification 2MT2 manufacturers may apply for API registration under API Spec Q1, 9th Edition, and/or ISO 9001:2015. Manufacturers may apply for a QMS Registration that includes a scope to design and manufacture Rolled Shapes with Improved Notch Toughness as applicable. Please follow the instructions found on API's website for completing the online application for APIQR Registration: (<http://www.api.org/products-and-services/api-monogram-and-apiqr/apply-renew-modify>).

Please note: If an organization completes the application process for licensing under API Spec 2MT2 prior to November 15, 2017; the application will be withdrawn and the organization will be contacted with further details concerning fees paid for the application.

For Monogram related questions regarding the removal of API Specification 2MT2, please send all inquiries to certification@api.org.

Sincerely,

Sharon Bowie
Manager of Operations, Monogram/APIQR
